About AITO Tours

The AITO Iran Tours, founded in 1989 as Azadi International Tourism Organization (AITO), is one of the largest travel and tour operators in Iran with more than 20 years of professional experience in the travel and tourism industry. AITO is supported by a network of offices around the world in providing tourism and travel to Iran. As a multi award winning tour and travel company, AITO specializes in adventure and unique cultural tailor made holidays, group tours to the most interesting places in Iran and its neighbouring countries, and Medical Tourism.

AITO MedTour

As the world's best healthcare destination, AITO MedTour is focused on bringing only the best medical services for you. For a medical tourist, one overarching question before taking the decision to travel for treatment is about quality and safety assurance. With a focus on delivering the best experience for those seeking health and wellness, AITO MedTour offers all medical tourists, an assurance of quality and safety.

Whether you are in search of a hospital, a clinic or a physician, the AITO MedTour makes high-standard medical care and full service recovery in Iran available to you.

Iran a Healthcare Country

There is no better place for your health and wellness than Iran.

There are countless reasons why Iran is an ideal destination for medical tourism. Iran represents a welcoming mix of vacationing, natural and living environment. Iran offers the widest of attractions from luxury urban spots to mountains, ancient attractions and historical sites. It's burgeoning healthcare and medical tourism and facilities are at par with international standards.

So, if you take the decision to travel for treatment, Iran has the required elements to support medical tourism.

Aftercare in Iran

Good aftercare is hard to come by especially in another country.

However, Iran is very fortunate to have ready access to natural mineral springs and geothermal waters. These springs and water reserves present this area with a fantastic opportunity to further develop as an international destination for natural spa tourism. Geothermal water and mineral springs have long been associated with improving mental and physical health through therapeutic bathing and relaxation.

With reference to the healing benefits of natural hot and mineral springs, AITO MedTour provides medical tourists with natural hot and mineral springs destinations and also relaxation locations and atmospheres. From hot springs, spas, mud with medicinal properties and fresh warm water ideal for swimming, you will leave Iran feeling rejuvenated.

What We Do

We help hundreds of patients to have secure Cosmetic, Optical, Medical and Dental procedures performed in accredited medical facilities with Board Certified Surgeons and physicians whom are experts in their respective fields. Our priority is patient safety and care with an emphasis on comfort.
